

## **Personal Statement**

**Ningfei Wang**

I am Ningfei Wang, a full-time master student in Lehigh University. I want to attend the ACM CCS Workshop 2018, for our paper 'Integration of Static and Dynamic Code Stylometry Analysis for Programmer De-anonymization'(#23) is accepted by AISec 2018.

I will present SUNDAE, a novel code de-anonymization framework that integrates both static and dynamic stylometry analysis. And our approach outperforms state-of-art methods in Python code de-anonymization.

Our SUNDAE promises direction for code stylometry research. I really want to show such works in the CCS workshop and discuss the future works.

Estimations of travel expenses are as follows (All '\$' presents USD).

Visa fee \$77

Flight \$220

Hotel \$300

Registration \$323

Total \$920
